

Product description

The Aircraft Base Station is a critical communication hub designed to facilitate reliable audio connections between ground crews and aircraft.

Its robust design ensures clear and uninterrupted communication in demanding environments. Ideal for aviation applications, it enhances operational efficiency by allowing seamless coordination during critical tasks, ensuring that teams remain connected at all times.

Main features

Noise reduction

Weight	250g
Size	118x54x33mm

Designed for Push-Back, Maintenance and De-icing

Advanced Ergonomics

Noise reduction

Certification	Europe, US, Brazil Japan, Taiwan
----------------------	----------------------------------

Compatible to any wired headset of the competition

Removable battery pack

Network technology

Network	DECT
Range	300 m
Type of connection	Full Duplex
Encryption	AES 128 bits
User capacity	4
Frequency	1791 to 1928 Mhz

Can be wirelessly connected to :

- Airlink 2085 headsets
- Airlink 3085IA headset

Full Duplex communication (users can emit and receive at the same time)

Vocal announcement for use hand free

Delivered with a bumper for shock protection

Battery

Autonomy	14h
Charge time	<90 min

Additional options :

- Bluetooth
- Long range
- Remote recognition
