

Product description

The fixed embedded base station is a versatile communication hub designed for integration within aircraft or marine vessels.

It provides centralized, reliable connectivity for all communication instruments, ensuring seamless coordination between onboard and external teams. Sturdy and highly compatible, it enhances operational coherence, making it ideal for aviation and marine environments that require a stable, all-in-one communication solution for complex operations.

Main features

Certification	
Certification	IP 54

Designed to be installed in helicopters or workstations

Network technology	
Network	DECT
Range	300 m
Type of connection	Full Duplex
Encryption	AES 128 bits
User capacity	8
Frequency	1791 to 1928 Mhz

Temperature range from -30° up to 60°

Advanced Ergonomics

Can be wirelessly connected to :

- Airlink 2085 headsets
- Airlink 3085IA headsets
- Airlink 3085IA beltpacks
- Airlink 2085 beltpacks

Full Duplex communication (users can emit and receive at the same time)

Battery	
Autonomy	16h
Charge time	80% in 2h30

Additional options :

- Bluetooth
- Long range
- Remote recognition
