

Plug & play embedded base

Airlink 3085IA

Product description

The mobile base is a versatile communication solution designed for use in dynamic aviation environments.

It provides reliable, wireless audio connectivity between ground crews and aircraft, ensuring seamless communication on the move. Compact and portable, it enhances operational flexibility, making it ideal for busy airports and industrial settings requiring mobile communication support.

Main features

Product description

Weight	250g
Size	124x68x32mm

Certification

Certification	IP 54
---------------	-------

Network technology

Network	DECT
Range	300 m
Type of connection	Full Duplex
Encryption	AES 128 bits
User capacity	8
Frequency	1791 to 1928 Mhz

Battery

Autonomy	16h
Charge time	80% in 2h30

Temperature range from -30° up to 60°

Advanced Ergonomics

Removable battery pack

Can be wirelessly connected to :

- Airlink 2085 headsets
- Airlink 3085IA headsets
- Airlink 3085IA belt packs
- Airlink 2085 belt packs

Full Duplex communication (users can emit and receive at the same time)

Powerful DSP-based noise reduction

Vocal announcement for use hand free

Additional options :

- Bluetooth
- Long range
