MOBILITY
& AWARENESS

Product description

The SafeComm base station is a modular communication solution designed to eliminate dead zones and extend network range in challenging environments.

With the ability to link multiple units together, it ensures seamless and uninterrupted communication, covering extensive areas and enhancing connectivity for operational teams. Robust and adaptable, SafeComm is ideal for demanding settings where reliable, wide-ranging communication is essential for safety and efficiency.

Main features

Product description	
Weight	250g
Size	124x68x32mm

Certification	
Certification	IP 54

Network technology	
Network	DECT
Range	300 m
Type of connection	Full Duplex
Encryption	AES 128 bits
User capacity	8
Frequency	1791 to 1928 Mhz

Battery	
Autonomy	16h
Charge time	80% in 2h30

Designed for industrial or naval using

Temperature range from -30° up to 60°

Advanced Ergonomics

Can be wirelessly connected to :
- Airlink 2085 headsets
- Airlink 2085 beltpacks

Chained base

Full Duplex communication (users can emit and receive at the same time)

Elimination of dead zones

Powerful DSP-based noise reduction

Additional options :
- Bluetooth
- Long range
