

Product description

The Integrated Headset is a state-of-the-art wireless communication solution designed for high-noise environments such as aviation, industrial sites, and ground operations.

It ensures clear, hands-free communication, enhancing team coordination, mobility, and safety. The headset is developed with a focus on durability and comfort, making it suitable for long hours of use in extreme conditions.

Main features

Noise reduction		Designed for Push-Back, Maintenance and De-icing
Certification	EN 352	
NRR	26 dB	
Advanced Ergonomics		Weight : 564g
Removable battery pack		
Network technology		Can be wirelessly connected to : <ul style="list-style-type: none"> Airlink 2085 base station An other wireless headset (Configuration Master/Slave)
Network	DECT	
Range	300 m	
Type of connection	Full Duplex	
Encryption	AES 128 bits	
User capacity	8	Full Duplex communication (users can emit and receive at the same time)
Battery		- Personnalisable color : orange, yellow, black
Autonomy	- Lithium battery 6h - NIMH battery 12-16h	
Vocal announcement for use hand free		Additional options : <ul style="list-style-type: none"> Bluetooth VOX
Conservation		
Temperature limit	-30° up to 60°	

NRR data

f(Hz)	63	125	125	500	1000	2000	4000	8000
