

Product description

The operations desk is a versatile communication solution designed for use in controlled indoor environments.

It provides reliable, wired or wireless audio connectivity between operational teams and ground crews, ensuring clear communication within the workspace. Compact and user-friendly, it enhances operational efficiency, making it ideal for command centers, monitoring rooms, and other settings where communication with ground support is essential.

Main features

Product description

Weight	1123 g
Size (without micro)	21x23x9 cm
Size (with micro)	21x23x29 cm

Certification

Certification	Europe, US, Brazil, Japan, Taiwan
----------------------	-----------------------------------

Network technology

Network	DECT
Range	300 m
Type of connection	Full Duplex
Encryption	AES 128 bits
User capacity	4
Frequency	1791 to 1928 Mhz

Battery

Autonomy	10h
Charge time	4h30

- Full Duplex audio wideband
- Vocal announcement
- Can be powered by either battery or mains
- Frequency : 1791 to 1928 Mhz (2,4 GHz if long range)
- Range up to 300 m

Additional options :

- Long range
- Group separation
