MOBILITY
& AWARENESS

The new era of wireless headsets

Unmatched comfort

A light weight design, combined with memory foam ear cushions and a low-pressure headband, ensures exceptional comfort even on long flights.

Immersive sound quality

Wideband audio for crystal-clear communication (20-7000 Hz) and high-definition Bluetooth streaming (20 Hz-20 kHz) guarantee a seamless, refined listening experience in every situation.

Reliable wireless connection

An operating range of up to 300 metres, supported by DECT 6.0, provides secure, interference-free connectivity throughout the cabin.

Operational efficiency

Designed for easy maintenance and repair, headset downtime is reduced to a minimum to ensure constant availability during flights.

Built for aviation

Engineered with premium materials for demanding environments, this headset combines durability and long-term reliability.

Enhanced passenger experience

Intuitive controls and seamless wireless integration with onboard systems ensure a premium flight experience tailored to each passenger's needs.

Lightweight materials
lightweight design for ultra comfort

Effortless, hands-free control

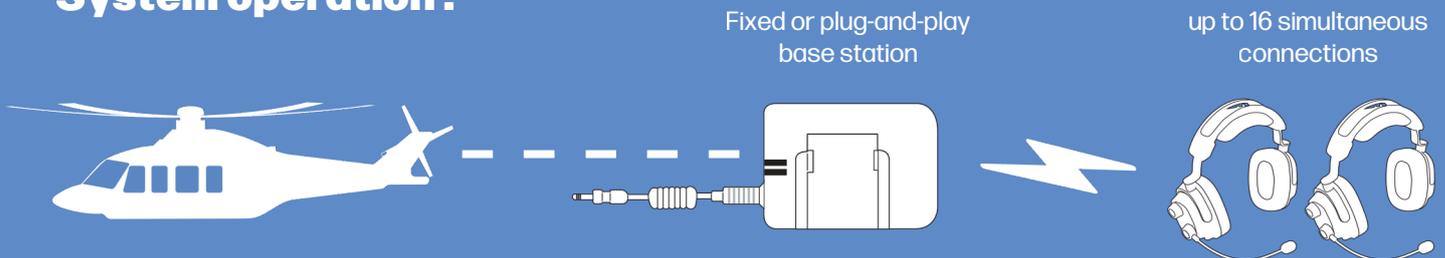

Active noise cancellation
Enjoy a quiet, restful flight

**Easily swappable &
rechargeable battery**
No interruptions, even on long flights

System operation :

Globalsys : a journey of innovation

Thirty years ago, GLOBALSYS pioneered the world's first wireless intercom system, setting new standards for mission-critical communication.

From aerospace to naval and industrial environments, our communication systems embody excellence in innovation, reliability, and performance. By enabling tight coordination in the most demanding conditions, we empower professionals to communicate with maximum safety, confidence, and efficiency. Since the launch of our first wireless intercom, we have continuously enhanced its capabilities, integrating cutting-edge technologies, refining the passenger flight experience, and anticipating the needs of tomorrow's operations.

What began as a breakthrough has now become an industry benchmark.

GLOBAL-SYS,
wireless specialist
for over 25 years.

Our impact

- Benchmark solutions for aerospace, naval, heliborne, and industrial applications
- Trusted by leading players worldwide
- Perfectly engineered, innovative, reliable, and high-performance audio communication solutions

Our promise

- Teamaudio communication in the most challenging environments
- Operating with safety, confidence, and efficiency
- Combining quality, innovation, responsiveness, and customer focus
